	Approved For Release 2008/09/19 : CIA-RDP80-00	0810A007700400010-5 25X1		
A CONTRACTOR OF THE PARTY OF TH	CENTRAL INTELLIGENCE AGENCY	REPORT		
	information report	CD NO. 25X1		
COUNTRY	East Germany	DATE DISTR. 16 September 1955		
SUBJECT	Radar Developments at Funkwerke Koepenick, Leipzig end Grasdam	NO. OF PAGES 1		
PLACE ACQUIRED	1	NO. OF ENCLS. Quested Below		
DATE OF DATE.		Supplement to 25X1 Report No.		

1. In early March, an exchange of the results of scientific (experiments between Furlances Koepenick and Funkwerk Dresden as suggested by a radar engineer, was turned down by Funkwerk Koepenick after the plan had already been approved by the cadre department. It was maintained that the instrument developed by Dipl Ing Winkler (fnu) at Funkwerk Dresden was to serve entirely different purposes and that because of the very different type of work orders, the plants would hardly find any common ground. A leading engineer stated that the instrument involved was a small mobile 10-cm Mode unit. It was easy to install and even to operate in a sedan. The impulse output power was reportedly about 7 kV. The weak point of the instrument was allegedly the poor resolving property for targets which are located close together.

this is unevaluated information

- 2. In late March 1955, one of the three sets of basic records of the anticollision device (Meddo) prepared by Funkwerk Koepenick was to be
  submitted to Dipl Ing Winkler of Funkwerk Dresden and subsequently to
  Or. Franz H. Mangeof Funkwerk Leipzig. The plant management stated that
  Koepenick was the only plant working on a Meddo Set and that Dipl Ing
  Winkler and Dr Lange would only be informed on the project in order to
  give scientific advice to the development experts of Funkwerk Koepenick.
- The serious competition between the development stations of Funkwerk Koepenick, Leipzig, and Dresden was a result of the system of placing work orders and distributing funds for development projects. Dr Lange, therefore, did not receive a complete set of records of the Meddo set from Koepenick, but merely a sketch of the indicator unit K-5 28 with its external dimensions and a cable diagram for the external connections of the indicator unit. Dr Lange apparently, had very close connections the Ministry of Interior. His laboratory was ordered to employ only "state conscious" personnel. In early 1955, Lange's activities were frequently mentioned at Funkwerk Koepenick, but no details were obtained.
